

Concrete Bucket

- ★ **Ideal for pouring patios, pools or concrete forms**
- ★ **Heavy-duty dispensing door for multiple placements**
- ★ **Powder coat finish is easy to clean**

The concrete bucket is designed to carry and place concrete with a skid steer loader where cement trucks cannot go. Accurately place concrete quickly, without the mess. It is ideal for pouring backyard patios, pools, or into formed columns or walls.

This handy attachment has squared off corners and an easy to clean baked on powder coat finish. The hydraulically-controlled dispensing door closes with a tight seal for accurate multiple placements from the same load. Harley Concrete Chuter is a registered trademark of Glenmac, Inc.
