

SILENT 300

High Performance Screw and Stator Pump

Finally a high performance screw and stator pump that does it all! The Silent 300 can mix up 6 cu. ft. of material, while the hopper supplies the pump the previous batch of material. That's right - mix and pump at the same time! If the application requires spraying, no problem, just fire up the on board compressor. And to top it all off, clean up has never been easier as the Silent 300 comes with its own pressure washing system. Mix, pump, apply, clean up, and go! Modern Technology and Old School Quality at its finest.

Power

The quietized diesel motor is a 3 cylinder, liquid cooled, industrial duty Lombardini.

Reliability

The control panel includes a specially built computer which balances the supply of material with the rate of application. This feature reduces clogging significantly.

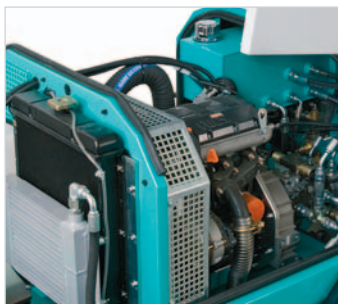

Reliability

The hydraulic drive horizontal shaft mixer is virtually maintenance free - just keep it clean. And that's a no brainer as a pressure washer is built into the system.

Jobsite Setup

Set-up is a breeze, as the Silent 300 is compact, well balanced, and has drop down stability legs.

Ease of Maintenance

Access to the engine and hydraulics is quite good. The entire canopy raises up assisted by gas pressurized struts. Maintenance checks are quick and easy!

SILENT 300

Quick Specs

Hopper capacity	53 gallons
Drum capacity	9 cu.ft.
Batch output	6 cu.ft.
Material flow rate	0 to 15 gallons per minute
Screw pump rpm	variable speed
Max. pumping distance	1"¼ hose 150 ft.
Max. compressor flow	14 CFM
Max. pump pressure	580 psi
Max. aggregate ø	¼"
Engine	Lombardini Diesel 3 cyl. 20 Hp
Weight	1.590 lbs.

OPERATING DIMENSIONS

Length	132"
Height	53"
Width	54"
